Project Design Phase-I
Solution Architecture

Date	20 October 2022
Team ID	PNT2022TMID15113
Project Name	Project - Personal Expense Tracker Application
Maximum Marks	4 Marks

Solution Architecture:

 Solution architecture is a complex process – with the many sub-processes- that bridges the gap between business problems and technology solutions. Its goals are to:

• Find the best tech solution to solve existing business problems.

• Describe the structure, characteristics, behaviour and other aspects of the software to project stakeholders.

• Define features, development phases and solution requirements to the project.

• Provide specifications according to which the solution is defined, managed, and delivered to the customers.
